

LMD offers a range of professional services to improve performance and outcomes for project developers, owners and operators.

LMD

LATITUDE
MANAGEMENT & DEVELOPMENT

Latitude Management & Development (“LMD”) are business advisors. LMD supports business to identify and realise value improvement opportunities in the resources, infrastructure, logistics, and industrial services sectors.

Based in Perth, Western Australia, LMD offers a range of professional services to improve performance and outcomes for project developers, owners and operators.

LMD was founded in 2015 with a belief that often the largest value-adds are obtained from enhancing the management and interfaces between key business functions.

These key functional areas include strategy, business and project development, construction and infrastructure, operations, technical, procurement, complex contracts and commercial, and governance.

That’s a long list, and where LMD is different is that its key staff have demonstrable experience in and across each of these functions. LMD can provide the ‘big picture’ support where it adds value, take a deep dive into a specific project or function, or perhaps a more nuanced solution.

Our breadth and depth are illustrated by the diversity of LMD’s engagements and our capacity to respond nimbly to client needs.
